    • Childhood

• Parentheses
  • ()
TIPS

It depends on each search:

1. Try keyword searches initially
2. Look at MeSH (or CINAHL Headings) terms of articles that you like
3. Look at “Similar Articles” - R hand side (PubMed)
4. Look at the references in the articles that you like. Look at references for more articles
5. What MeSH or controlled vocabulary has been applied to articles you like?
BEST KEY WORDS FOR TELEHEALTH

• Depends on topic
  • Telemedicine
  • eHealth
  • Mobile Health
  • mHealth

• Can also use Controlled vocabulary – like Mesh
OTHER RESOURCES

https://researchguides.drake.edu/ot

- CINAHL (EBSCO) – but we currently have a 4 user limit
- PsycInfo (Proquest) – behavioral and mental health database
- ERIC (EBSCO) – access to research, literature and resources for educators
- Cochrane Database of Systematic Reviews – Well respected medical database that has rigorous systematic reviews
CITE NON-BOOK AND NON-JOURNAL SOURCES;

• e.g. websites, conference presentations, white papers?
• APA Style Central > Learn tab > Sample References > Browse by topic (left-hand side)

Abstract: Researchers and clinicians have successfully demonstrated the use of telehealth in supporting parents to conduct functional analyses (FAs) and subsequent functional communication training (FCT). We replicated and extended previous research by utilizing telehealth to train an existing Early Childhood Special Education (ECSE) Behavior Specialist to support parent implementation of behavioral procedures. Board Certified Behavior Analysts (BCBAs) coached the existing Behavior Specialist via telehealth, who in turn trained and supported parents to conduct FAs and implement FCT in a community clinic. In four children, 3 years of age and younger, the function of challenging behavior was successfully identified according to a multielement research design. Challenging behavior reduced, and the selected appropriate communication strategy increased for all participants, evaluated using an A-B research design. The study provides initial...
